

# David Hentschel

There can be few record producers or musicians around today who have as impressive a list of achievements as David Hentschel. Over the years he has worked with some of the greatest names in contemporary music - Genesis, Elton John, Andy Summers, Paul McCartney, Mike Oldfield to name but a few. A multiple Grammy award winner and voted three times 'Producer of the Year', David's abilities also include musical composition and contemporary and orchestral arrangement, often composing for films and television - his most notable success being the score for the movie 'Educating Rita'. David, a pioneer of the synthesizer, works from his own studio in the UK and also in New York, Los Angeles and Nashville, where he continues to collaborate with some of the world's most talented jazz, rock and pop musicians. David's musical talent and inventiveness have enabled him to help shape the sound of today's recorded music, while exploring the music of tomorrow.
